ABOUT US

We Are Lemoni Lab, Experts of Momentum

Welcome to Lemoni Lab, where our team combines a passion for art with advanced programming skills to create a unique presence in the industry. Our team is known for being innovative, driven, warm, and welcoming.

At Lemoni Lab, we believe that art and technology are intertwined and inseparable, and this belief is deeply ingrained in our team of highly skilled and talented professionals. This unique perspective sets us apart and drives the growth of the creative industry in our local and regional communities.

Our commitment to staying at the forefront of the industry allows us to continuously deliver diverse and dynamic solutions to the world of technology.

OUR MISSION

Innovation Unleashed

We strive to push the boundaries of technology and innovation, creating software that not only meets but exceeds the needs and expectations of our clients. We believe in fostering a culture of excellence and continuously elevating our standards to stay ahead of the competition.

OUR VISION

As we envision the future, we see a world where art and innovation intersect, creating a robust and unbreakable connection between creativity, critical thinking, and engineering. This world is one where the power of innovation and development is maximized, with a perfect blend of artistic creation and advanced technology driving progress forward.

WHY LEMONI LAB?

Opting for Lemoni Lab should be a no-brainer - don't hesitate!
Make your choice with confidence.

- Expertise and Experience
- A Team of Skilled Professionals
- Exceptional Results Guaranteed
- Quality Products
- Revolutionary Solutions
- Trusted and Reliable Partner

OUR

SERVICES

Software Engineering Consultancy

Consultation with excellence and expertise!

Let our expert software engineers take your business to new heights of success. Our skilled professionals will handle all technical tasks, freeing you to focus on your vision and goals.

Trust us with the technical details and let our dedicated team help your business reach its full potential with top-quality solutions. Let us work alongside you to achieve the success you deserve.

UI/UX Design

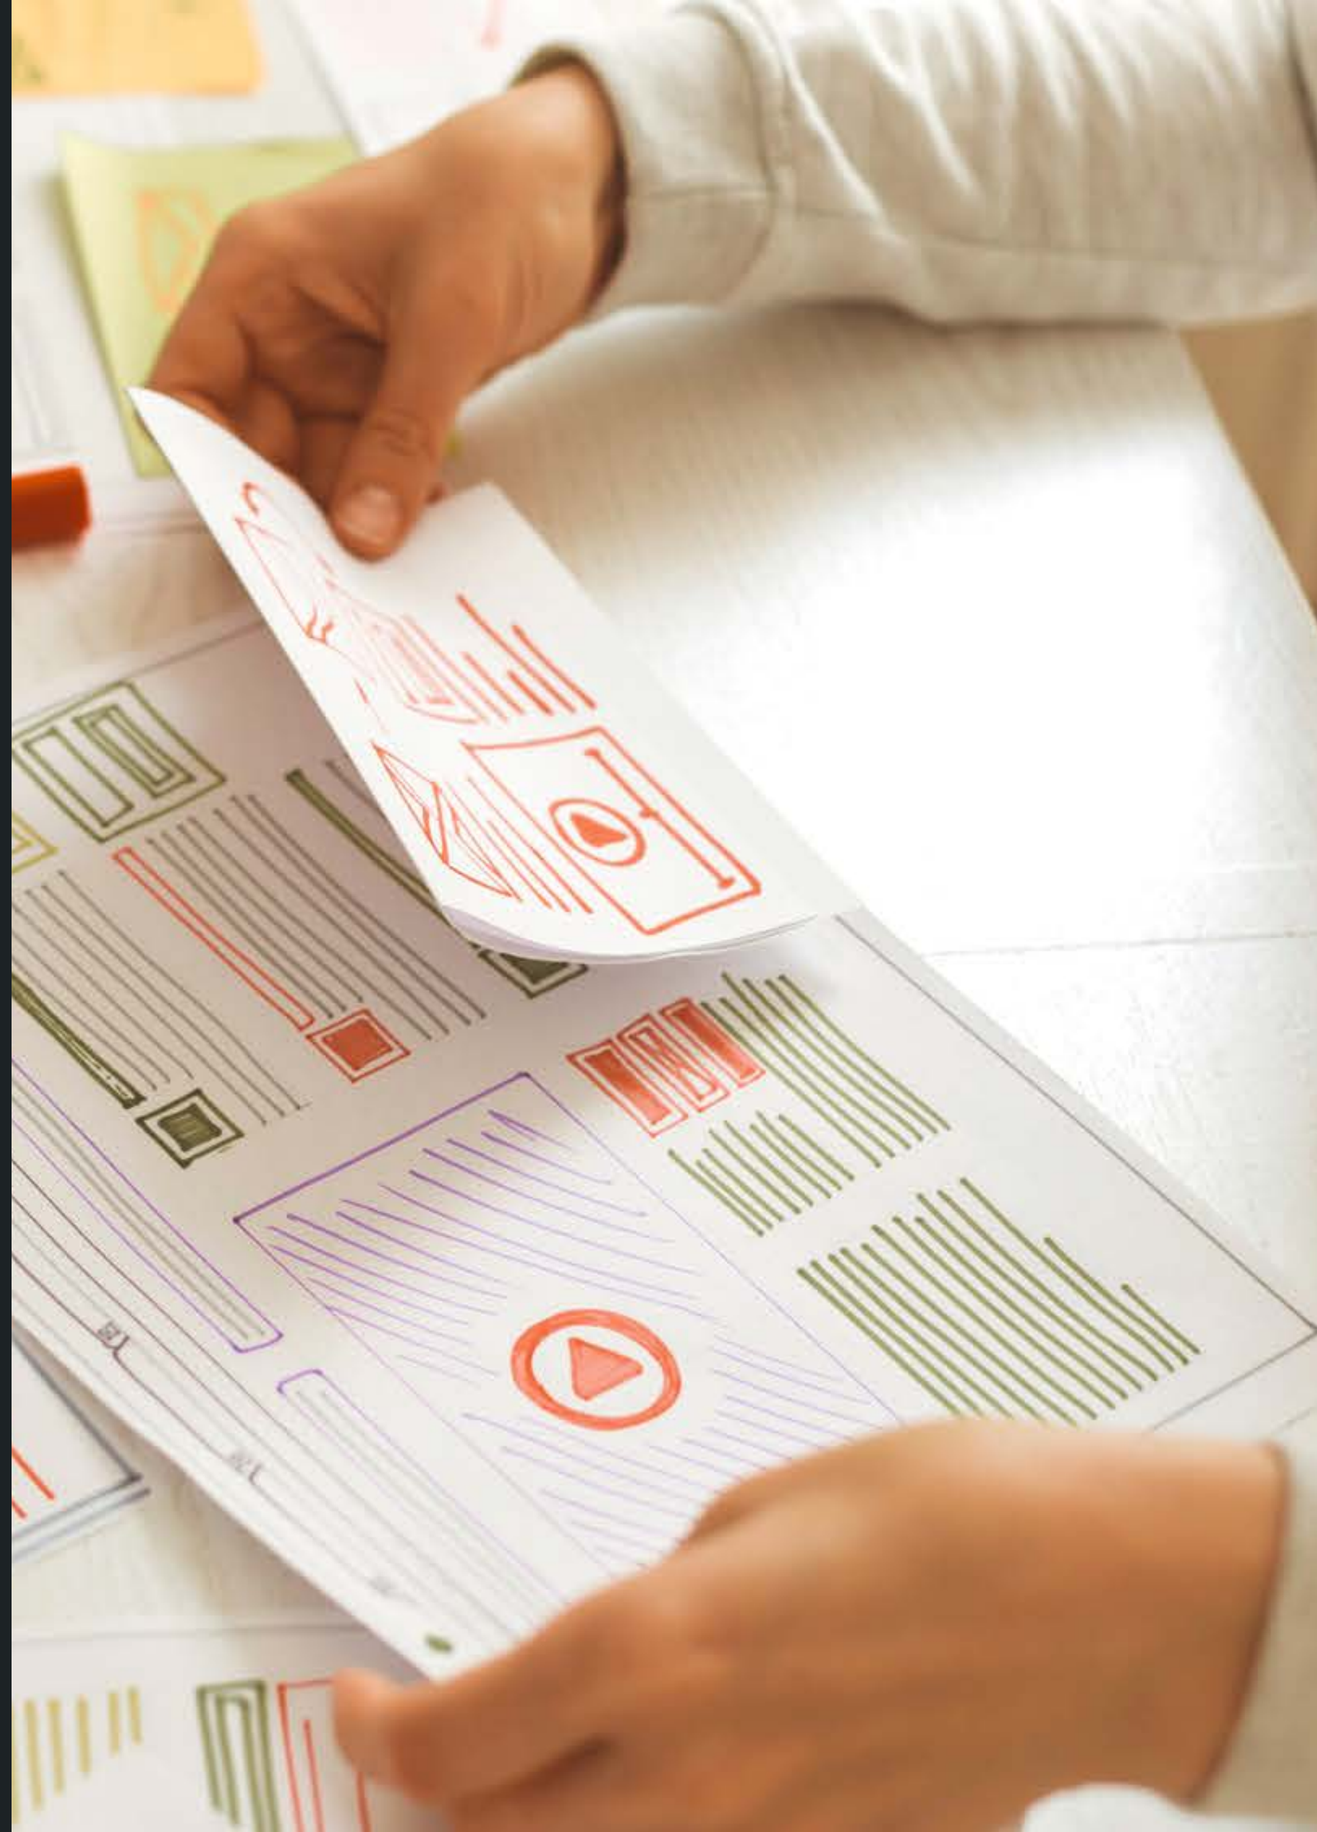
Our process is meticulously designed and executed in order to achieve a smooth transition to final reflections

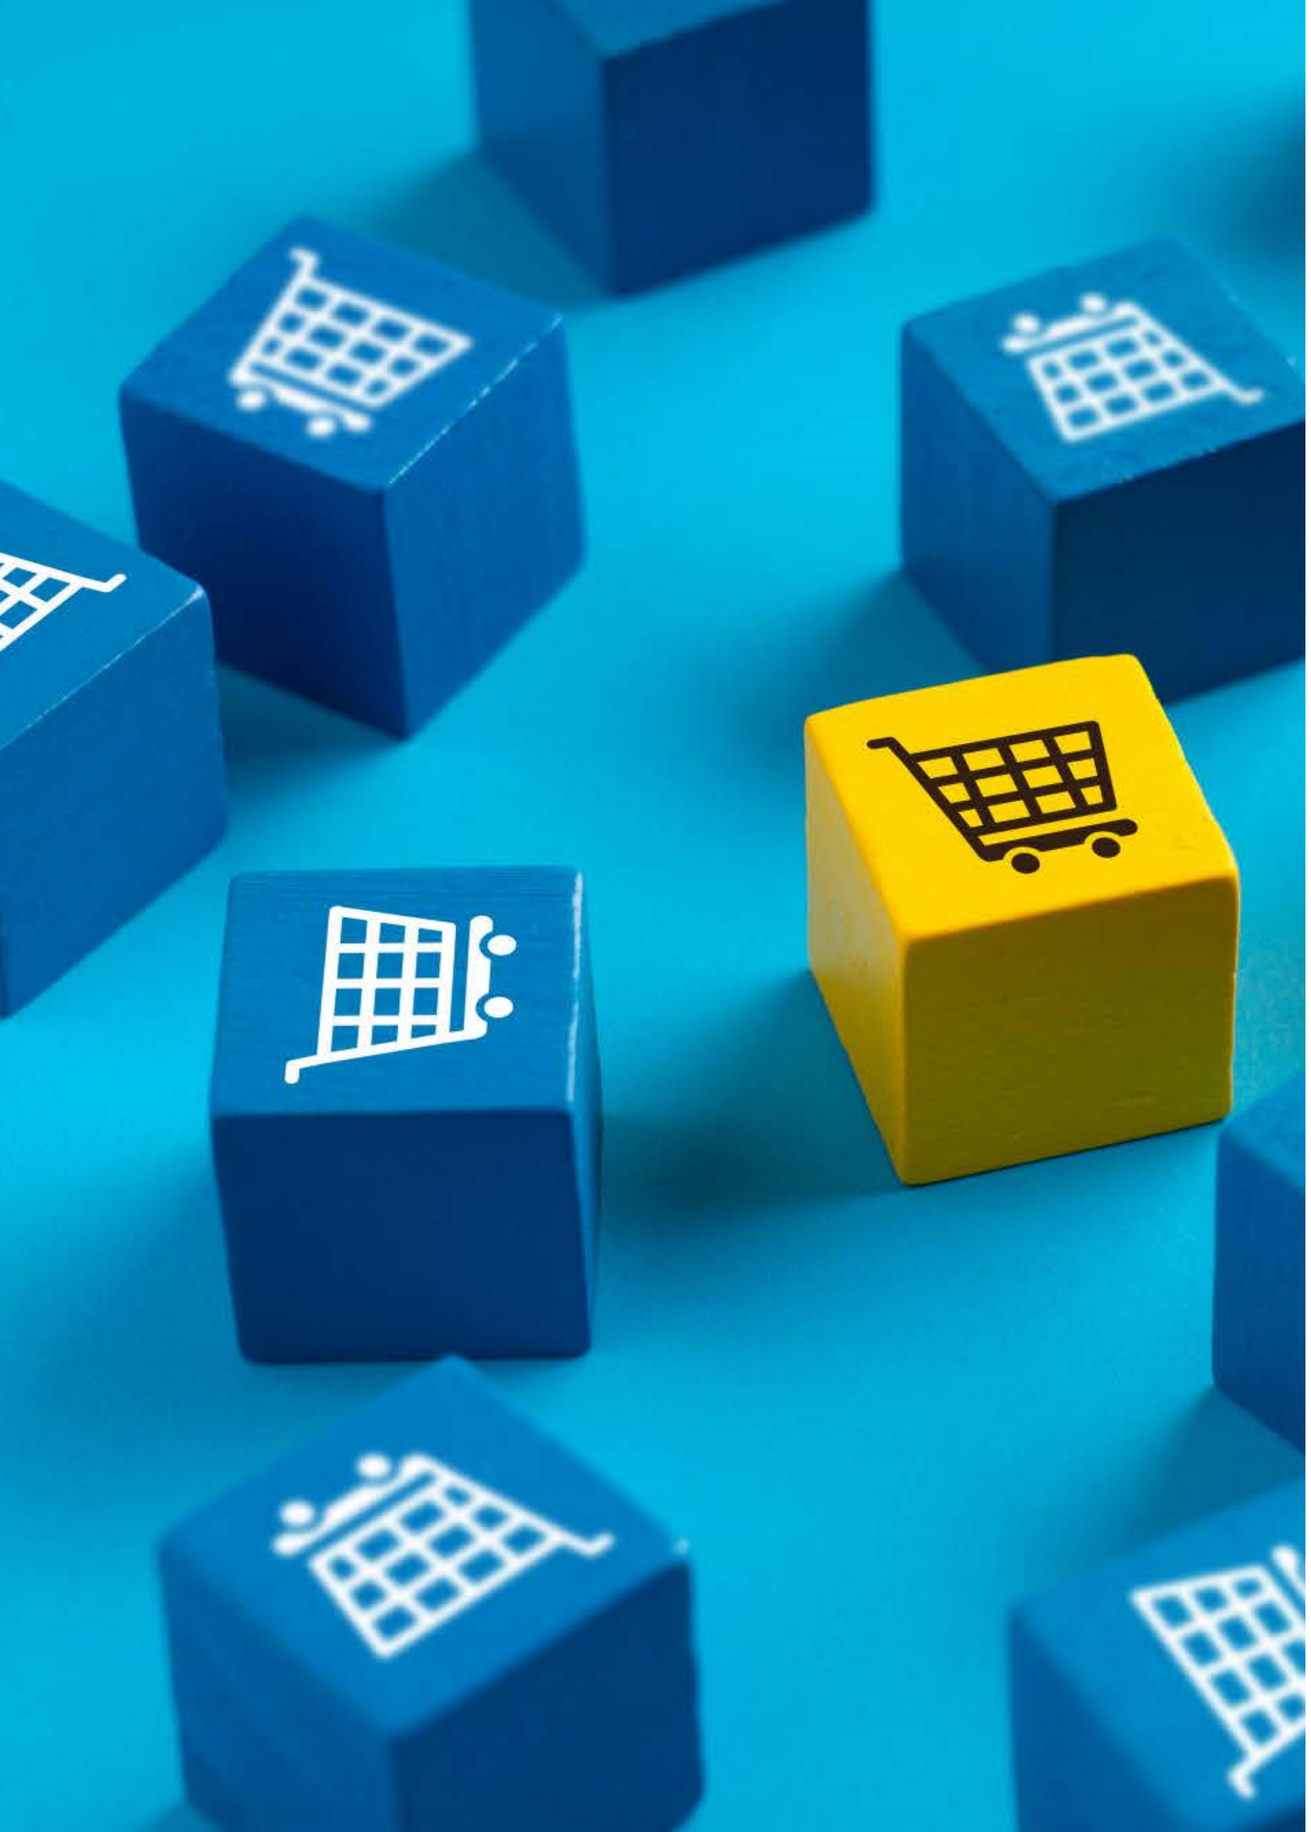
User Experience Design

> We research, create personas, use empathy mapping, and create wireframes to design a seamless experience for our users.

User Interface Design

> We craft our creation with visual appeal and a user-friendly interface, resulting in a product that combines functionality and simplicity, inviting full use.





X-Cart Development

We offer X-Cart services for custom installation, design, integration, and maintenance of dynamic online stores and web portals.

Our team of eCommerce experts specializes in various shopping cart frameworks and can also provide consulting to bring your digital dream to life.

Let us help you succeed in your eCommerce journey.

Service Level Agreement (SLA)

It’s not goodbye!

> Upon delivering our products, we implement best practices in web support to ensure a consistently high-quality and reliable experience for our valued clients.

> To streamline communication and minimize potential bottlenecks, we utilize a critical-based ticketing system. Our dedicated team is always available to provide assistance, with **24/7** availability.

Dedicated Team Service

The dedicated team model is cost-effective as it eliminates the need for hiring and training new employees. It is task-focused, flexible and adaptable, making it an ideal solution for complex long-term projects that have the potential to expand.

Contact us today to learn more about how a dedicated team can benefit your business.

MVP Development Service

We understand that startups may not have current funding and may not have an existing system in place, which is why we offer a comprehensive service that includes NDA, multiple brainstorming sessions, user flow, list MVP features, product design, clickable prototype, product development, and the option to outsource tech support with our agile team of developers and designers or to build your own dedicated team with complete support and necessary services to assist during the transition.

Do you want to stand out from idea-only startups and get noticed by investors with a working MVP? Then our MVP Development Service is just for you!

DevOps Service

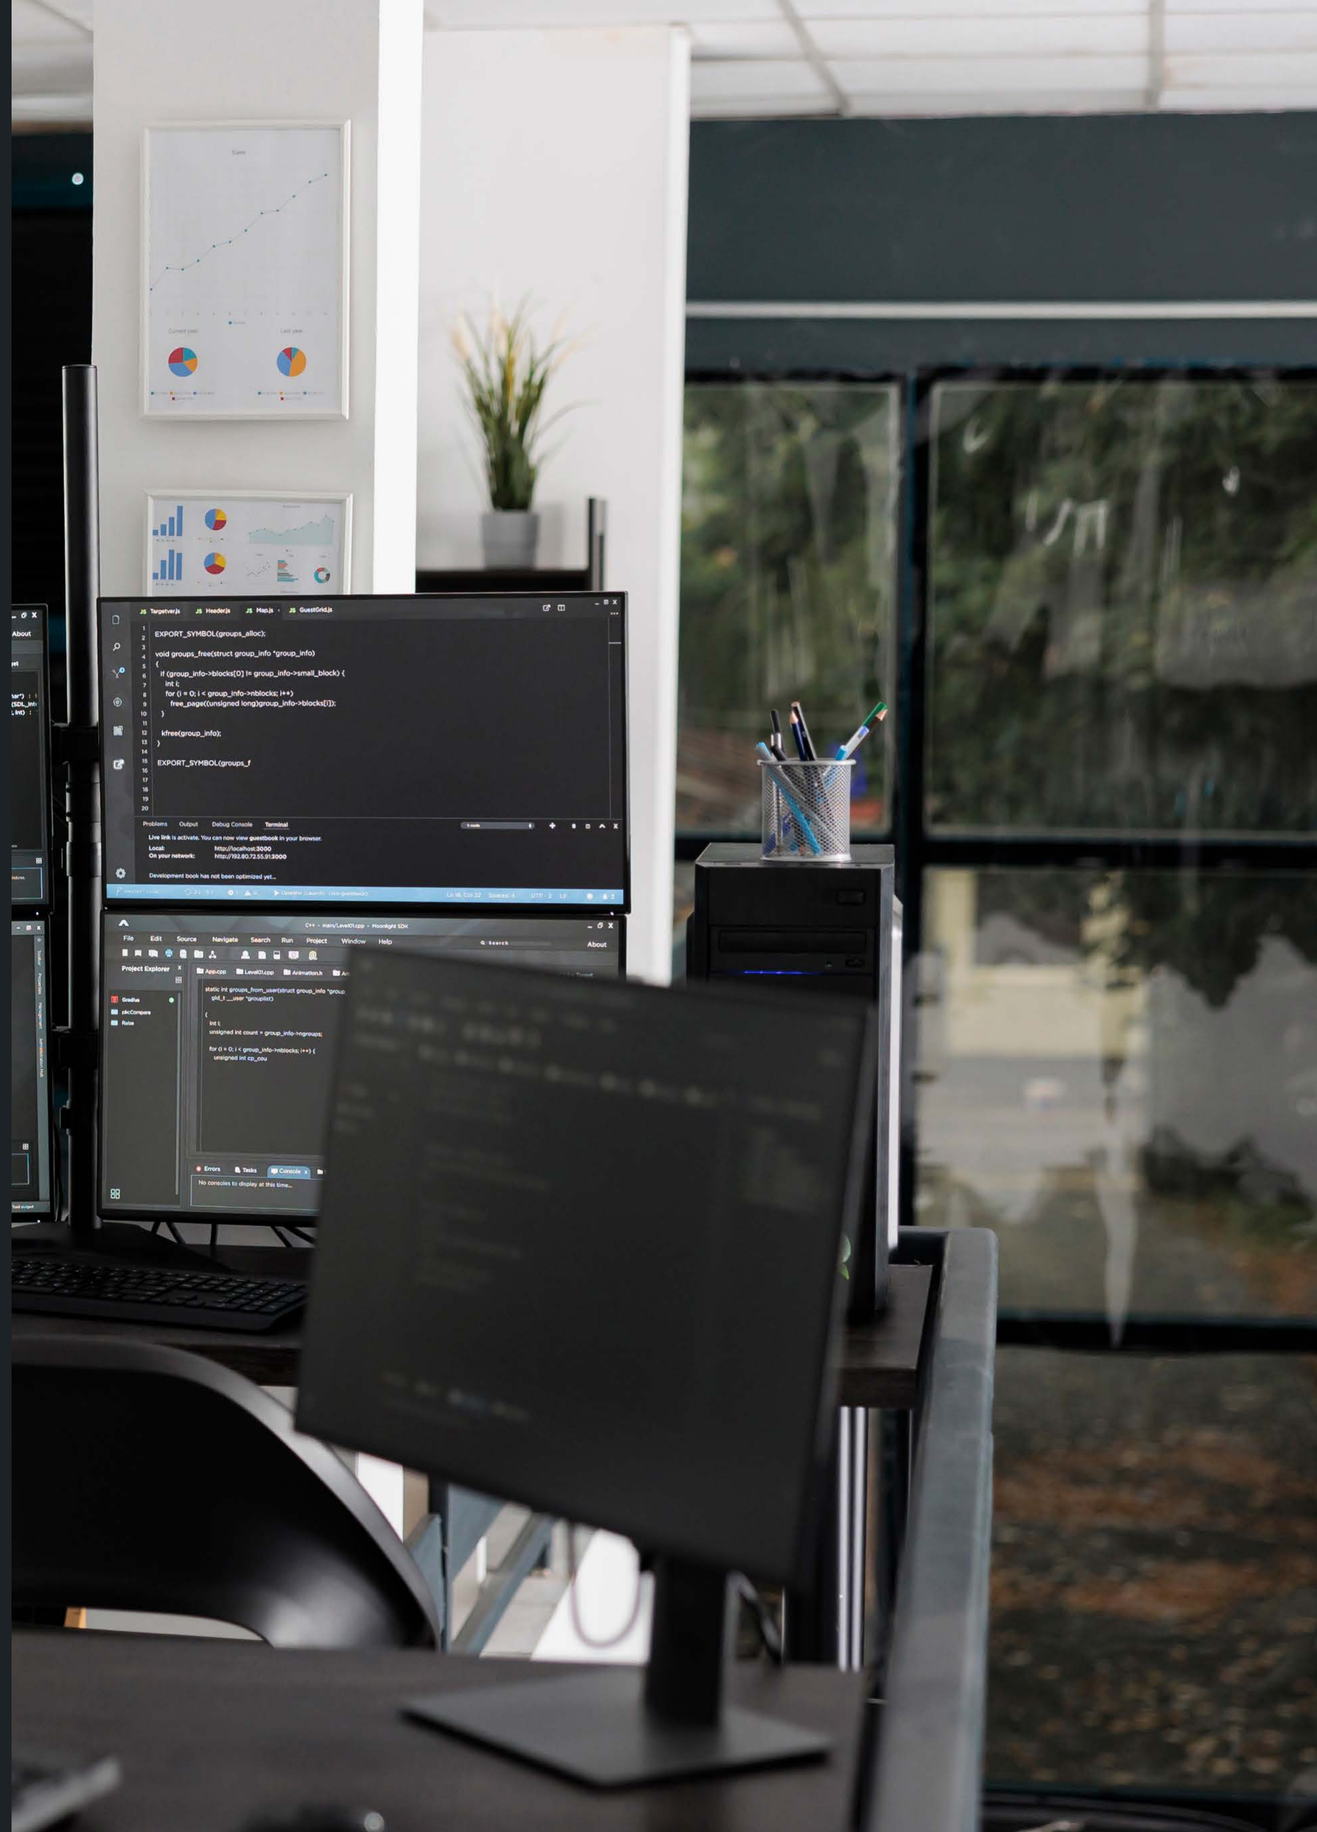
DevOps is the key to unlocking the full potential of your software development process. With our team of experts, we offer a comprehensive range of DevOps services, including consultancy, implementation, monitoring, and maintenance, to help you optimize your systems and increase efficiency.

Our DevOps service is tailored to meet your unique needs. Contact us today to learn more about how we can help take your software development process to the next level!

Development Service

Development Services are crucial for businesses that want to create custom software solutions that provide advanced and tailored functionality. These services allow companies to design, architect, and implement user-friendly and engaging software products that can be marketed to business users or individual consumers. This can be particularly beneficial for companies that may lack in-house IT resources and are looking to reduce development costs.

Want to learn more about how our Development Services can help your business? Contact us today!



AWS Management Services

Optimize your AWS infrastructure with Tradinos' powerful AWS Management Service.

EC2: Flexible and scalable compute resources in the cloud.

RDS [Relational Database AWS Service] Effortless management and scalability for relational databases.

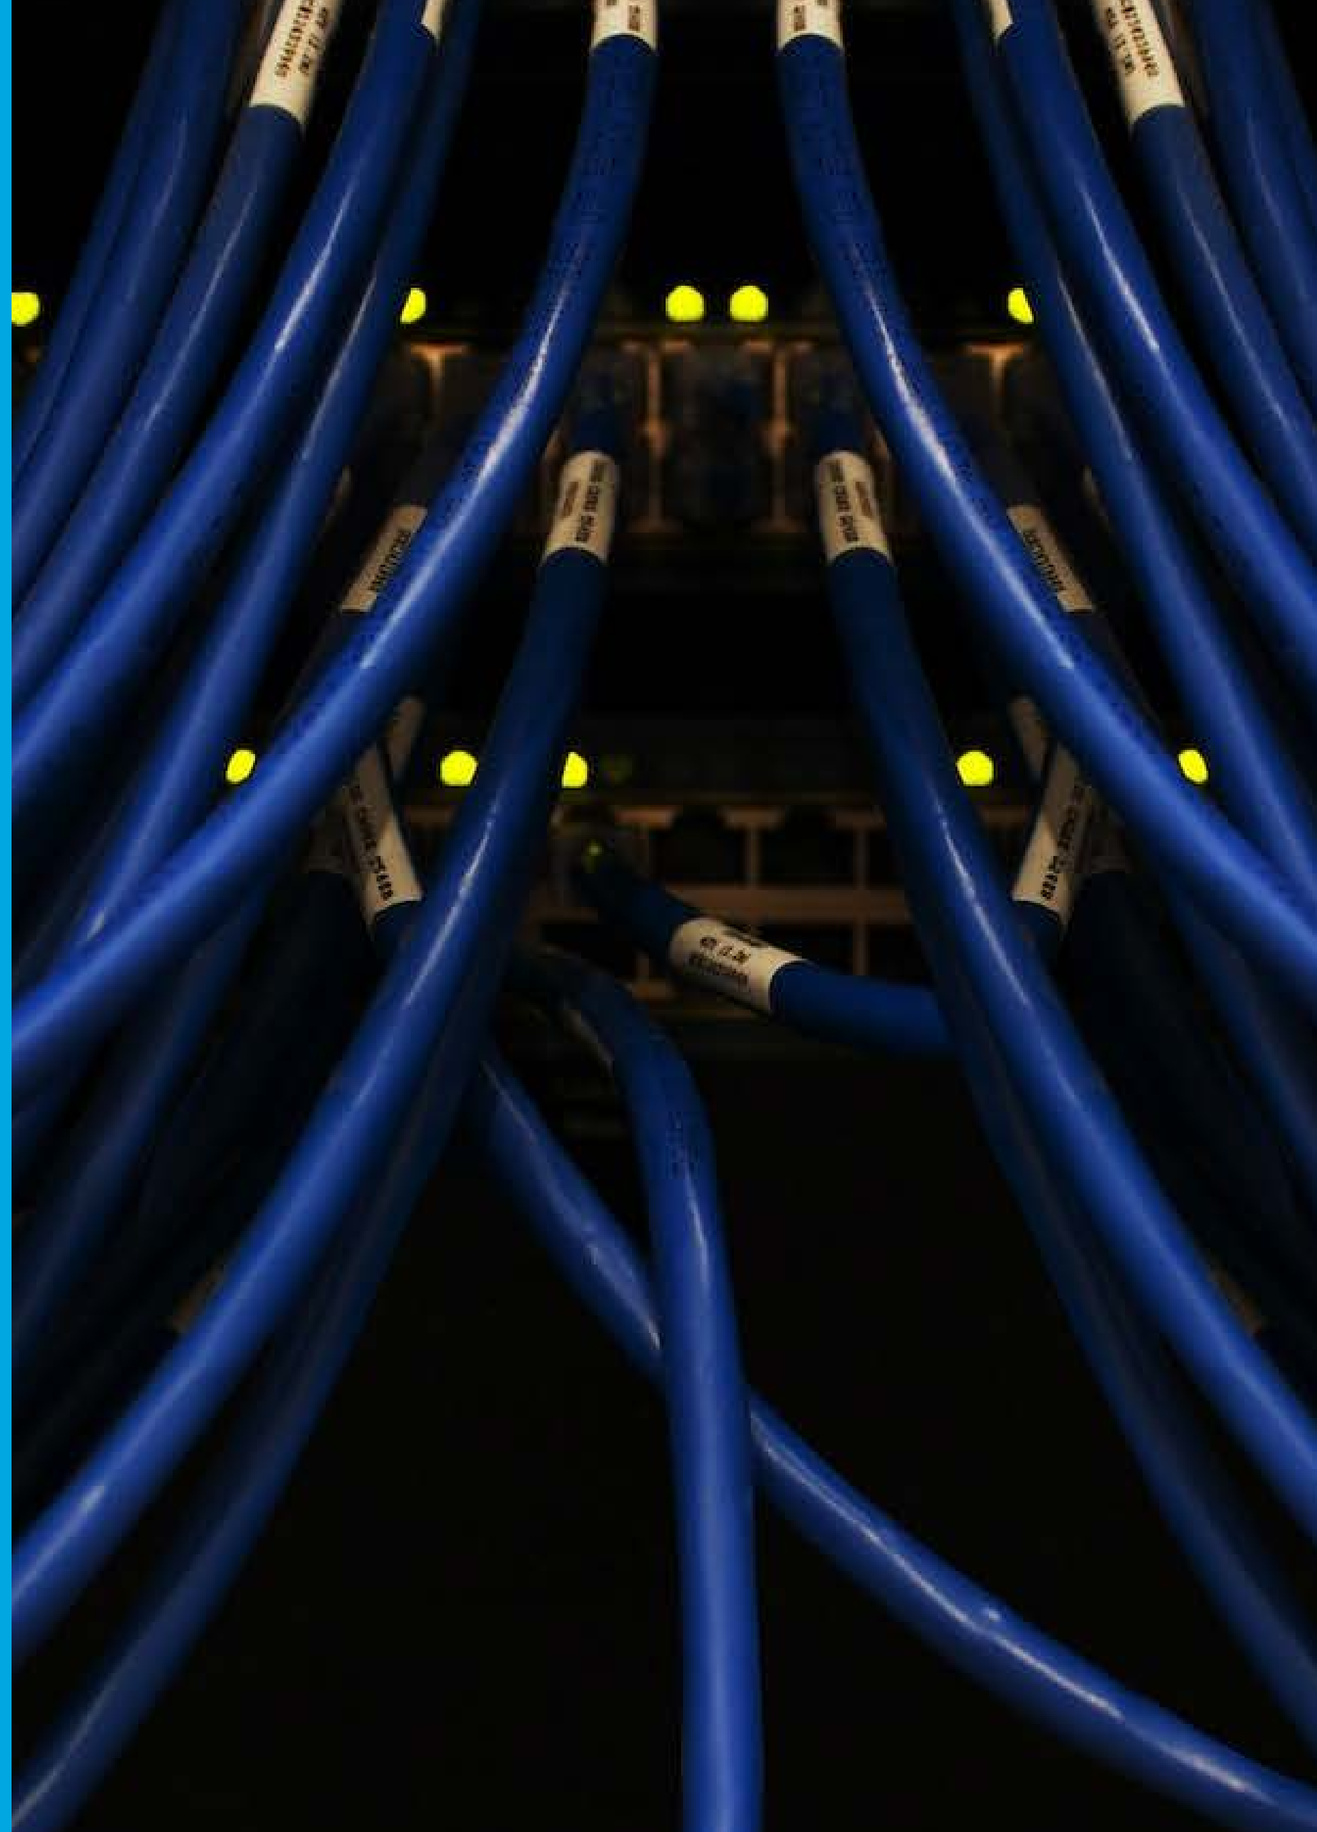
S3: Secure and scalable object storage for any data.

Cloud front: Fast and reliable content delivery worldwide.

Load balancer: Efficient distribution of traffic for high availability.

EC2 Auto-scaling: Automated adjustment of compute resources based on demand.

AZ availability zone: Isolated locations for increased reliability and availability.



OUR TOOL KIT

OUR PROCESS

Our Agile-Scrum process ensures every project is flawlessly executed, meeting all functional requirements and exceeding expectations.
We mainly follow six basic steps to create magic:

Step 1: Study and Analysis

Step 2: Sprint Design

Step 3: Design Approach

Step 4: Agile Development

Step 5: Quality Assurance

Step 6: Functionality and Security

Partner with us for reliable, top-notch digital solutions.

OUR TEAM

60 TECH SAVVY TALENTS

OUR CORE TEAM

We are a team of tech-savvy well structured and already invested a lot of time in building technologies, scaling startups, and making ideas into reality

OUR PROJECTS

carloapp.com

Carlo

E-payments - Rewarding

Start-up

Monaco, Spain, France

Challenge/The problem

> Local economies struggle to attract and offer added value for customers against large business players.

Solution/ Description

> A mobile application that creates a network of local shops, supporting them with an effective cashback system to attract communities and support the local economy.

GET IT ON Google Play

Download on the App Store

Main Features

1. Transactions through bank account, cashback, and crypto
2. Adding friends and splitting the payment with them
3. Referring others and getting cashback for each transaction they do
4. Reports for the wallet balance, transactions, and referral earnings.

Services offered

- Software Engineering Consultancy
- UI/UX Design
- Support
- DevOps
- Development
- SLA

Processes

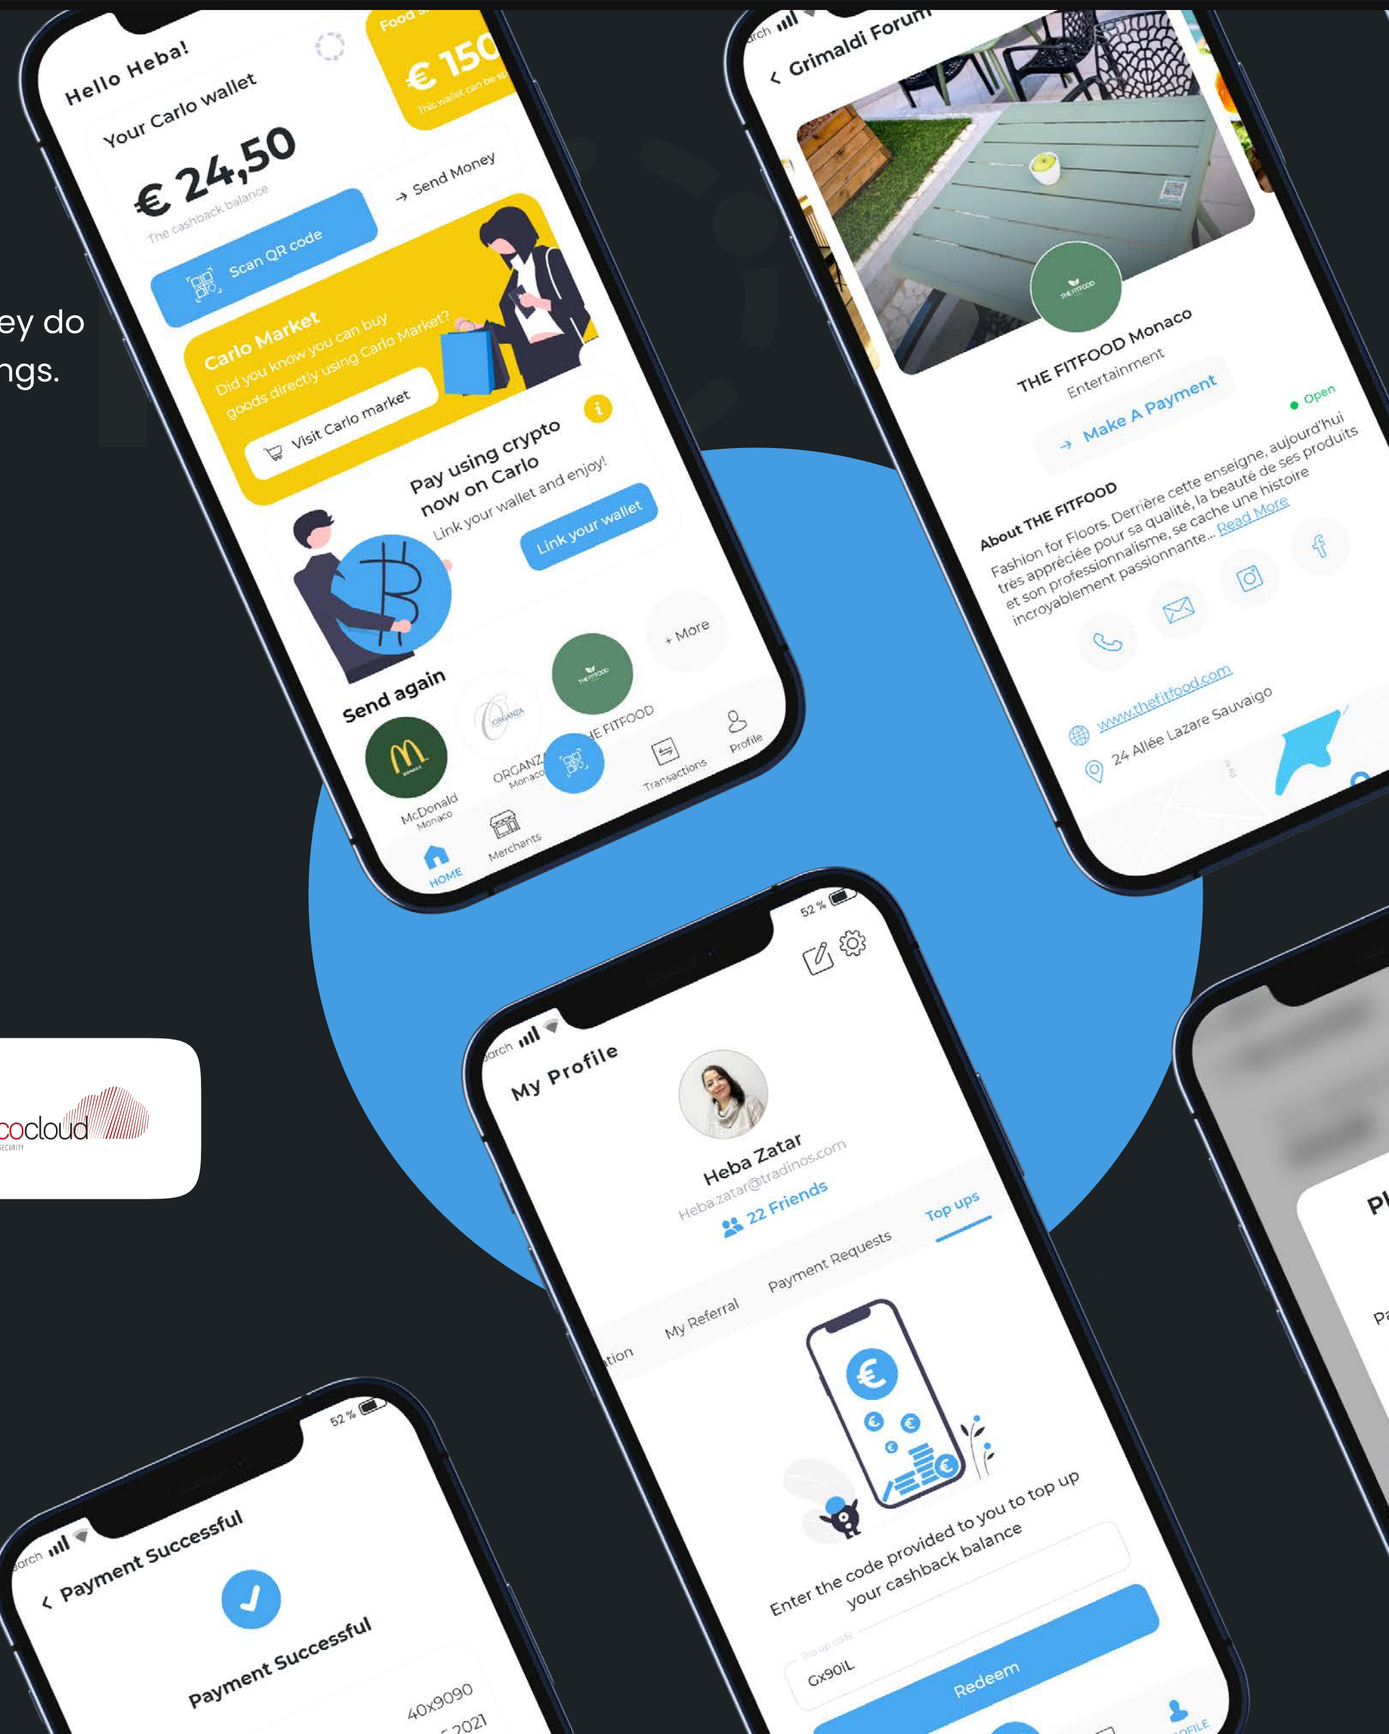
Integrations:

- Lemonway payment gateway
- Sendinblue
- Firebase
- MoEngage
- Qori
- Google Analytics



taximonaco.com

MC CAB

Transportation Mobility – Drivers Management platform **Start-up**

Monaco EU

Challenge/The problem

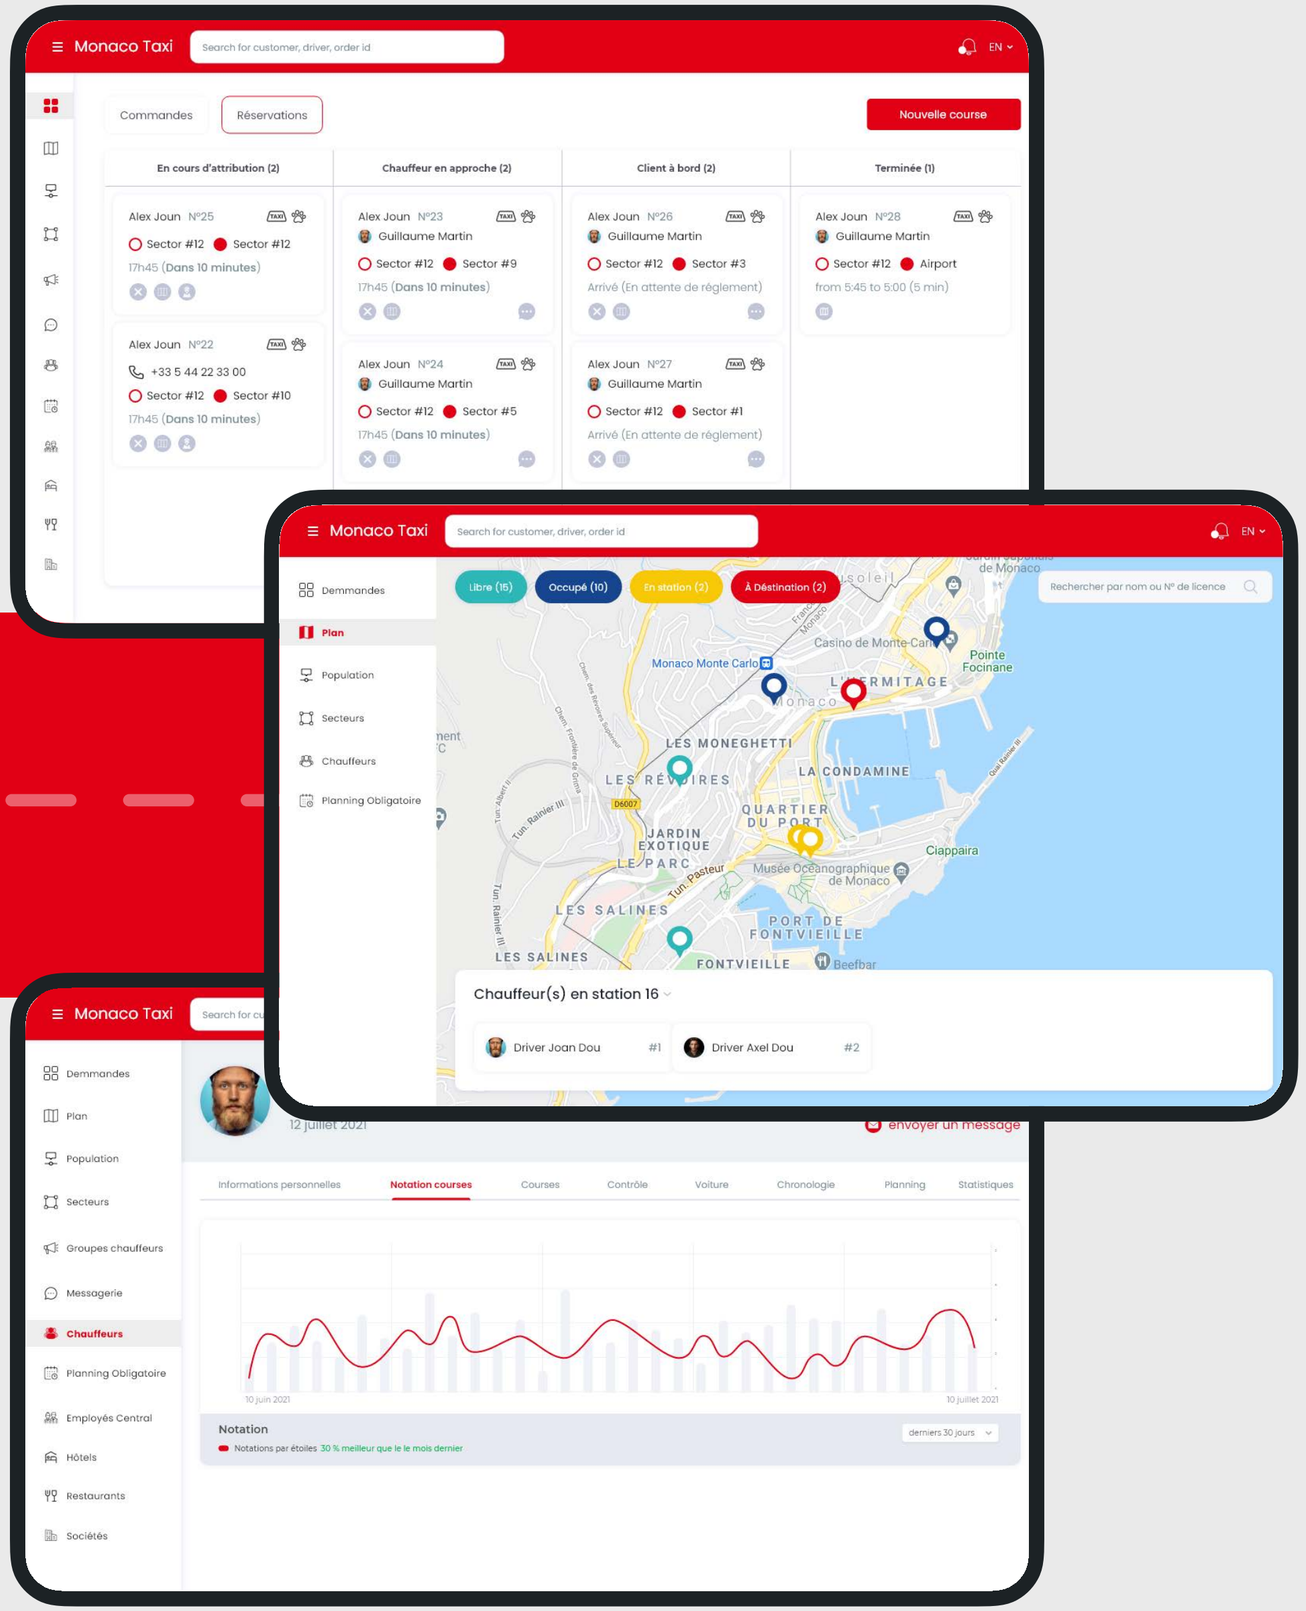
> The platform faced challenges in catering to the specific needs and restrictions of the Taxi management in Monaco, which had multiple layers based on drivers' location and status.

Solution/ Description

> An innovative approach to transportation and mobility to fulfill the high demand and increase user satisfaction, as well as taking the transportation sector in Monaco to a whole new level.

GET IT ON Google Play

Download on the App Store



Main Features

1. On-demand orders and reservations with the high-level distribution.
2. Integration with taximeter devices to allow for out-of-app orders.
3. Integration with google maps, twilio, virtual ip pbx and e-payment

Services offered

- UI/UX Design
- Development
- SLA
- AWS

Paquik

Shipping - logistics

Start-up

International

Challenge/The problem

Courier companies are struggling to meet the demand for quick delivery, resulting in potential delays of weeks for shipments. Additionally, the cost of using these services can be high and not all countries are supported, making it difficult for travelers to make money while on the go.

Solution/ Description

An alternative solution is to use travelers to send items instead of couriers. This creates a win-win situation for both the sender and the traveler, as the sender gets their shipment delivered on time and the traveler earns money.

GET IT ON Google Play

Download on the App Store

Main Features

1. Select origin and destination for shipment, add receiver info to post
2. Request VIP/emergency shipment handling by admin for added cost
3. Share travel plans for pick up and delivery for profit
4. Pay fixed percentage for insurance, with Paquik covering non-delivery cost

Services offered

- Software Engineering Consultancy
- UI/UX Design
- Development
- SLA
- DevOps
- AWS Management service

LMIS – Labor Market Intelligence of Syria in collaboration with UNDP

www.undp.org

Business and employment-focused – Education – Logistics

Nonprofit organization **MENA**

Challenge/The problem

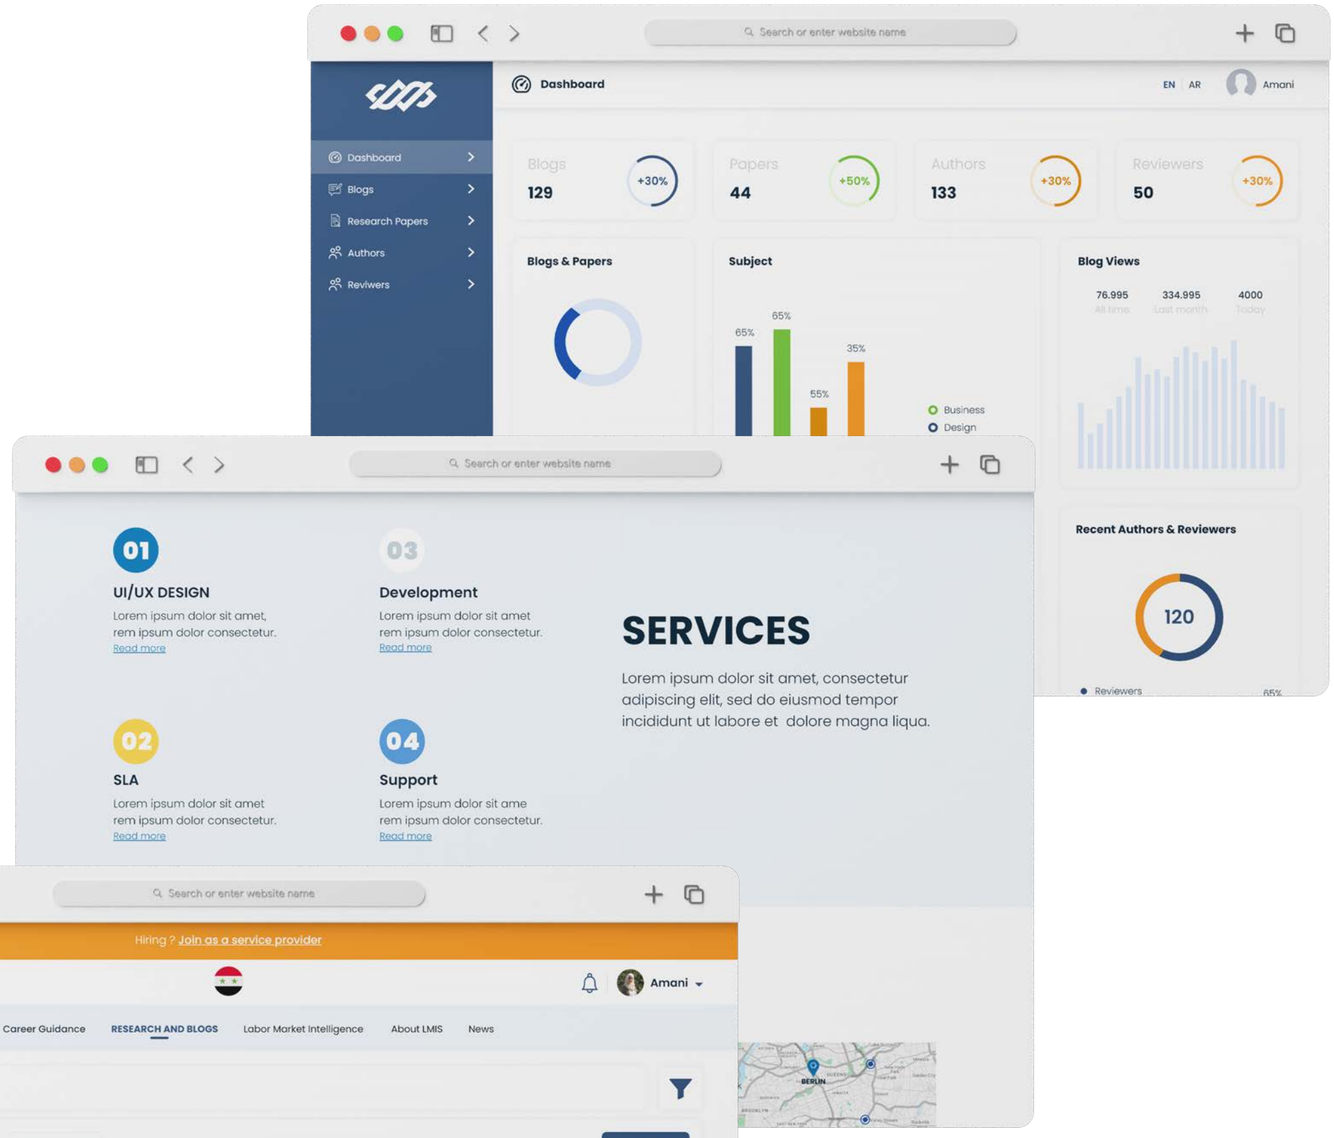
> The challenge was to find the appropriate logic for a vast platform that caters to a user segment that represents the entire population of a country. Another challenge was addressing all the requirements and incorporating them into a user-friendly and easy-to-use design for the LMIS section.

Solution/ Description

> A robust solution was implemented to create a comprehensive portal for the main user, allowing them to navigate the site, apply for jobs, training, read/publish articles, and view labor market indicators.

Main Features

1. Building and updating CV
2. Searching and applying for job opportunities
3. Creating job openings and receiving applications
4. Finding training opportunities
5. Reading and creating research papers
6. Accessing information about labor market indicators.



Services offered

- UI/UX Design

Skills and Tools Used

1. User experience design
2. User interface design

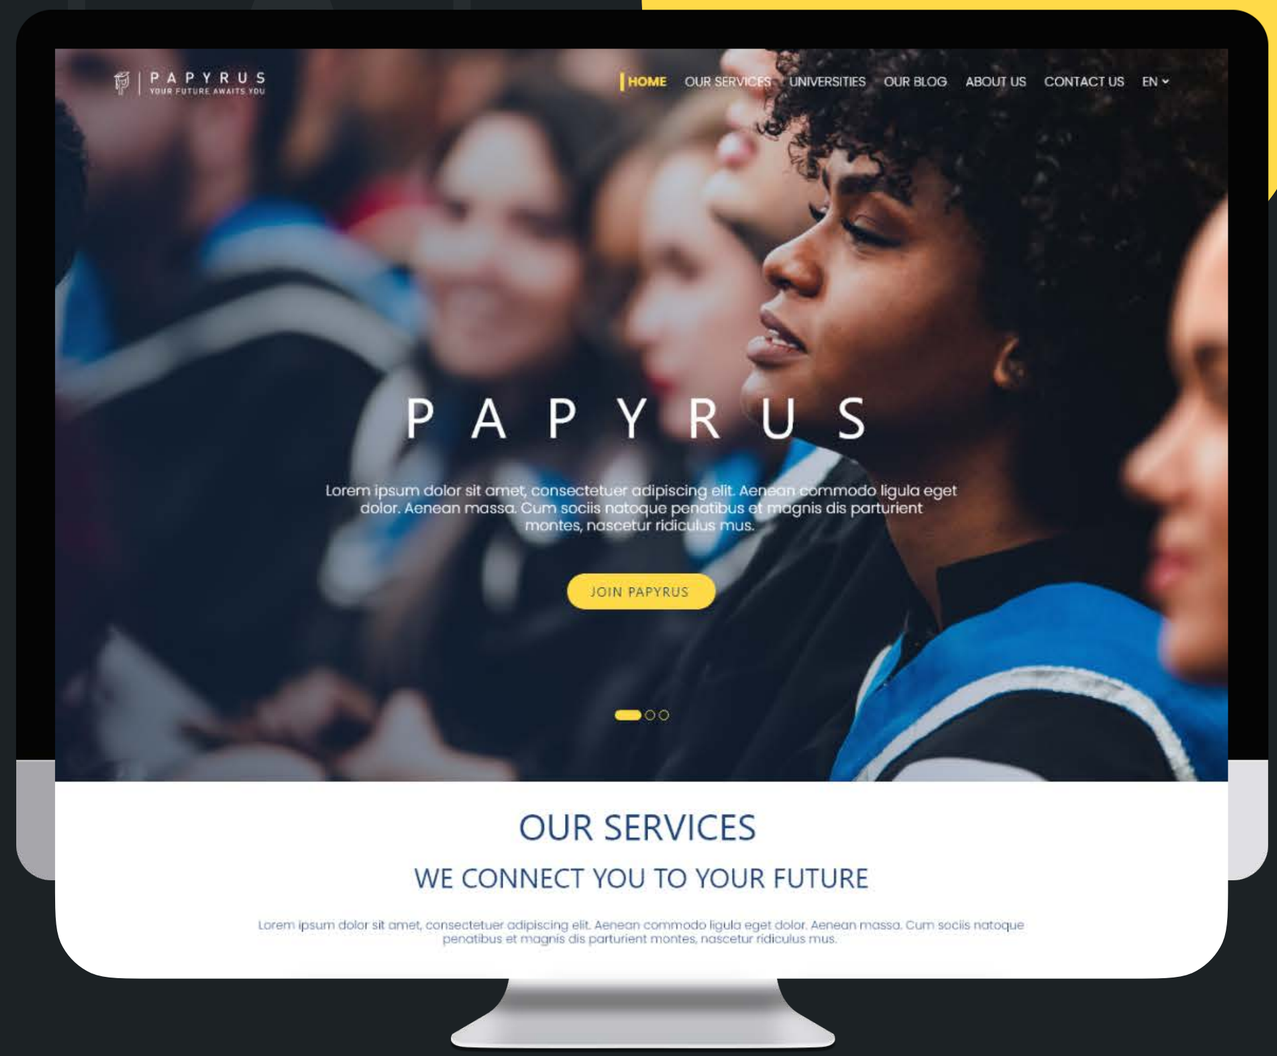
PAPYRUS

YOUR FUTURE AWAITS YOU

Education - Social community

Start-up

Monaco



Challenge/The problem

There is a need to establish a connection between students and alumni to provide guidance in career paths and facilitate private sessions.

Solution/ Description

A website will be created that connects students with alumni from their university and provides a user-friendly tool for scheduling and conducting mentoring sessions.

Main Features

1. Ability to schedule sessions between students and alumni
2. Option to join sessions through platforms such as Google Meet or Microsoft Teams
3. Mentorship opportunities
4. Rating system for mentors and students
5. Chat function for communication between students, mentors, and alumni.

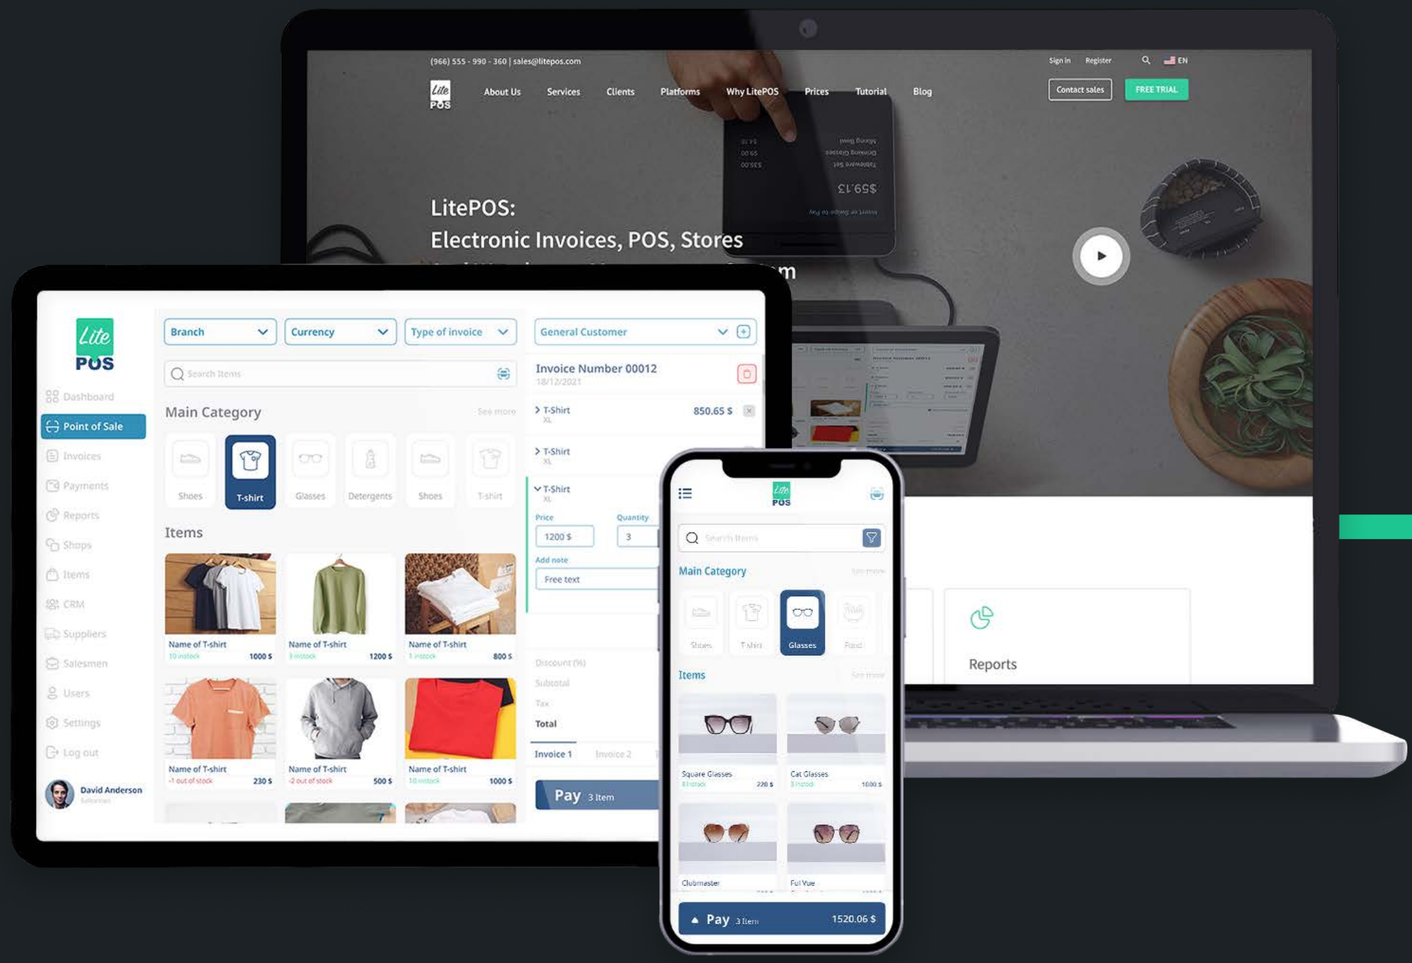
SAAS Service

GCC



Challenge/The problem

Retailers and wholesalers in the MENA region face high costs to set up their stores and expensive software and hardware to manage sales and inventory, as well as long queues at cash registers. They also face competition from e-commerce and need a CRM system to encourage repeat customers.

Solution/ Description

A cloud-based solution provides inventory management, point of sale through mobile devices, and a CRM system to increase sales. It also allows retailers to manage multiple branches, track revenue in real time, integrate with e-commerce platforms, and collect payments through NFC technology.

GET IT ON Google Play

Download on the App Store

Main Features

1. Simple and easy to use cloud-based POS.
2. Supports barcode scanner, VAT types, and multiple payment methods.
3. Compatible with IOS, Android, and Windows.
4. Ability to make changes and updates in real-time across all branches.
5. Automatic logging and tracking of all transactions and inventory changes.
